Fact Sheet

- Equip small offices with a complete communications solution
- Lower cost of ownership — no central hardware, use internet connections for voice traffic
- Call management, voice mail, auto attendant, call log and conferencing are all included

Avaya one-X™ Quick Edition — Simple Business Communication System for Small Offices

Avaya one-X™ Quick Edition delivers intelligent communications to very small businesses and small branches of enterprises. SIP-based peer-to-peer technology means set up is simplified, with powerful options to customize to meet business needs.

Quick Edition delivers customizable business class communication features including voice mail, conferencing, auto-attendant and rich call management features. Connect multiple remote branches and manage them centrally. Equip home workers with the same features they have in the office, at home. Call forward, park, page and retrieve, auto-attendants and custom voicemail create a professional business image. Quick Edition a simple, cost-effective and connected business communication system.

Key Benefits

Small Business:

For small businesses of less than 20 users, Avaya one-X Quick Edition provides a cost effective way to get access to large enterprise features at a fraction of the cost:

- Option to lower monthly phone bills with internet based phone calls.
- Enhance business productivity with auto attendant, conferencing and voicemail.
- Low total cost of ownership, with no central server.
- Buy the number of phones you need today, add as required tomorrow.

Branch Office:

For small branch offices, Avaya one-X Quick Edition provides a cost effective way for IT/Telecom Managers to rapidly deploy head office functionality in remote sites:

- Lower branch communication costs by directing voice traffic over the WAN.
- Quicker onsite installation process — reduces need for onsite technical support.
- Manage remote branch configuration at the click of a button.
- Lower TCO with the elimination of centralized servers (acquisition, deployment and maintenance).
- Deploy business productivity features such as voicemail, conferencing and auto attendant.

Robust Feature Set

Avaya one-X Quick Edition delivers the communications features small offices rely on most:

- Teleworker — for home or remote offices

- Multisite provisioning tools mean bulk upgrades and configurations are a snap
- SIP Trunking
- Call Park, Page and Retrieve
- The basics — Hold, Forward, Transfer, Speed dialing etc
- Voicemail — 20 minutes of voicemail per phone
- Auto attendant capabilities for automatically answering and routing calls

Connecting Small Offices

Now, small doesn't mean you're on your own. With Quick Edition, small branches of larger enterprises can connect to a central site for a host of benefits. Enterprise dial plans increases speed and efficiency of internal communications. Utilizing internet or WAN infrastructure to reduce call costs can herald big enterprise wide savings.

Built-in Backup

Eliminating centralized hardware creates a more reliable system, as Quick Edition telephones automatically back each other up.

If a phone fails, the network still functions, For example, you can still collect voicemail messages to that extension and incoming calls will continue to be forwarded.

Simple System Management

The Quick Edition system can be administered via any PC that is connected to the network (locally or remotely) using a web-based administration interface. The new Multisite Provisioning tool allows network administrators to set up configure and upgrade from a central location.

A Cost-effective, Scalable Solution

Should your business needs change, Quick Edition phones will in the future be upgradable to more enhanced Avaya solutions such as IP Office or Communication Manager.

Avaya one-X Quick Edition Flexible Configuration Options

Traditional Standalone

Uses existing phone lines from traditional phone service provider to provide dial tone. This provides a simple migration from multiple analog lines/analog phones and enables a continued relationship with trusted suppliers.

SIP Standalone

Replaces traditional phone service provider with a new "SIP Phone Service" Voice traffic is passed securely over the internet. May reduce monthly costs and provide a single source for both voice and data connection

Connected Sites

Multiple sites connect using SIP, over the Internet or Wide Area Network. An Avaya SIP Enablement Server at the central site handles all traffic. Avaya Communication Manager can be used to provide enterprise wide dial plan and select features. This provides for cost reduction through leverage enterprise WAN and trunking infrastructure and may help reduce or eliminate traditional dial tone in multiple branches
